

Blink Game Clone Development Company - Grab the Halloween Offer - Gamesdapp

Gamesdapp offers Blockchain Game Development Services to build a DApp Gaming Platform like BLINK, built on Binance Smart Chain with a better performance and advanced security.

The gaming industry is now able to gain a huge revenue potential, by adding blockchain technology to games. While blockchain gaming has grown significantly in recent years, it's still facing some challenges in terms of speed and cost. Binance Smart Chain is here to solve the major pain points by presenting a high-speed, scalable, and low-cost infrastructure.

Blink Game Clone Development

BLINK is the first blockchain gaming ecosystem launched on Binance Smart Chain. We Gamesdapp offers Blockchain Game Like Blink on Binance Smart Chain that empowers to build your own Gaming DApp platform and digital assets on one blockchain and take advantage of the fast trading to exchange on the other.

Now let us have a glance at Binance Smart Chain, how to develop a clone game like BLINK on Binance Smart Chain, and how you can start earning on Binance Smart Chain's gaming DApps.

What is Binance Smart Chain?

Binance Smart Chain (BSC) is described as a blockchain that runs in parallel to the Binance Chain. Unlike Binance Chain, Binance Smart Chain implements cross-chain ability, smart contract functionality and compatibility with the Ethereum Virtual Machine (EVM).

Since Binance Smart Chain is EVM-compatible, it can be launched with the support for the rich universe of Ethereum tools and DApps. This makes it easy for the developers to port their projects over from Ethereum. For users, it means that wallet applications like MetaMask can be easily configured to work with Binance Smart Chain.

BLINK - The first Blockchain Gaming Ecosystem on Binance Smart Chain

BLINK is BSC's first gaming DApp platform that runs alongside the existing WINK platform but having a separate site with all betting in BNB. BLINK is designed to allow the members of the Binance ecosystem to gamble or get use of the most popular gaming platforms in DApp. This cooperation has resulted in a brand new gaming platform hosted entirely on BSC, called BLINK.

This platform enables the BNB holders to start using their tokens thereby experiencing the adventure of daily gaming and wealth redistribution. WINK

believes BLINK is more beneficial to participants in the Binance ecosystem as it will expose them to new revenue practice as well as a host of entertaining blockchain-based games.

Why Binance SmartChain?

Binance Smart Chain maintains high performance by providing low latency and high throughput for a large user base. As Binance community has supported WINK, it was the first gaming IEO to launch on their launchpad and Blink will be the first large-scale DApp to launch on Binance Smart Chain. WINK team chose Binance Smart Chain because it offers low latency and high throughput for a large user base, making it as a high-performance blockchain network as well as the number one Gaming platform.

Binance Smart Chain provides the market with a feasible alternative for ethereum.

Moreover, BSC has two advantages over Ethereum:

1. High transaction speed
2. Much cheaper

Benefits of Implementing Binance Smart Chain on Gaming DApp

- Fast transaction speed

- Low gas fees
- Integrated ecosystem.
- Creates a healthy and trusted network
- Improved ROI module
- Proof of Staked Authority
- Accelerated transactions
- Elimination of fraudulent activities
- No third party
- Multiple gateway options
- Immutability
- Transparency

BLK Tokens

Initially, all betting will be in BNB. BLINK has added BEP20 tokens such as BUSD. BLK tokens are BEP-20 tokens that operates on Binance Smart Chain. It enable BLINK players to participate in the platform's wealth distribution. BLINK users will not only use the platform to gamble but also to earn a yield on their BLK tokens, which is the major aspect of BSC's first gaming DApp.

In future, a wide range of tokens on the Binance Smart Chain will gets added. Hence BLK token holders can technically earn revenue.

How to play & earn on BLINK?

Step 1 - Login to BLINK

To start playing/earning you have to 'Login' to connect your Binance Smart Chain wallet.

BLINK only supports the MetaMask client wallet.

Step 2 - Load up your MetaMask

Load some BNB into your MetaMask wallet or you can also use your existing Metamask wallet. Once after entering your Metamask password your wallet will get connected and ready to play.

Step 3 - Head to Dice

Click on Dice on the top left-hand, Dice is the name of the game.

Step 4 - Mining or Gambling?

Now you have to decide that you're here to gamble or to mine.

Gambling- In gambling your odds of winning are lower and its highly risk but higher the risk, pays the higher

Miners - It is suitable for those who are interested in making their bankroll last as long as possible so they can mine as many BLK tokens.

It's important to remember that whether its gambling or mining, win or lose you will always earn BLK tokens.

Step 5 - Freeze your BLK tokens

This is important to remember that if you're new to Blockchain Gaming. once after finished playing, freeze your tokens. Freezing basically means staking your tokens. Once you've done freezing your tokens you'll earn daily drops into your wallet. Daily BNB dividends, passive income will gets straight into your wallet every day the pool is positive.

Step 6 - Wake up and check your wallet

Everyone loves getting paid with BLINK and the BLK token. You'll be getting paid a lot for every single day.

How to Build Blockchain Game Like Blink on Binance Smart Chain?

To develop and launch your own DApp Gaming platform like BLINK, You have to hire the best blockchain game developers. Enhance your gaming experience in the evolution of blockchain game development with our game developers.

We - Gamesdapp offers [Blockchain Game Development](#) Services to build a DApp Gaming Platform like BLINK, built on Binance Smart Chain with a better performance and advanced security. We offer a wide range of Dapp development across all verticals. Our blockchain experts will design an engaging gameplay, creates real time gaming experience with innovation as well as keep your gamers and your revenue system busy.

We also offer **Binance Smart Chain Gaming DApps,**
